Introduction

CareBuilder leads the way in Technology Enabled Care, pioneering a person-centred approach that enables independent living with choice and control. The system is specifically designed to support diverse care settings, enhancing the quality of life for vulnerable individuals.

Our advanced IoT platform integrates seamlessly with an array of sensors, wearables, communication devices, and home automation tools. This integration bolsters the safety and independence of users, while also facilitating meaningful connections with their carers, families, and broader communities.

The deployment of our technology can be tailored to meet specific needs, ranging from a simple touchscreen tablet or sensor to a comprehensive array of IoT devices. This flexibility forms a cornerstone of the innovative hybrid or dispersed care model developed and operated by leading Councils and Care Providers.

How Does it Work?

CareBuilder, as the name suggests, is a comprehensive technology care system designed to enable individuals to maintain independence in their own home. Essentially, CareBuilder comprises of a HomeHub (Touchscreen Tablet) connected to a few, usually four, unobtrusive sensors strategically placed in the home. The system is personalised and built to match an individual's care needs, supporting their overall well-being and enabling individuals to connect with loved ones when needed.

The CareBuilder HomeHub (Touchscreen Tablet)

The HomeHub reminds individuals of tasks like medication, personal care, and meals. It makes prescription reordering easy and offers online shopping and booking services like taxis. Individuals can easily stay in touch with family, friends, and carers with a simple push of a touchscreen button

Video Calling (including Multiperson)

Daily Living reminders (eg Medication)

How to videos

Access to services (Pharmacy, GP, Taxis)

Portable

Calendar

Entertainment Apps

Secure access to the internet

Easy to read buttons

Written and Verbal prompts

Automatic "Push" Video

SMART Lifestyle & Safety Sensors

CareBuilder offers a broad range of compatible lifestyle and safety sensors, providing individuals and their loved ones with 24/7 peace of mind. These sensors also deliver the right information to the care team, ensuring that individuals receive the appropriate support to maintain their independence.

THE SENSORS ARE SMALL, UNOBTRUSIVE AND INCLUDE

Motion sensors

Open/Close sensors
(for doors/ windows, fridges)

The CareBuilder Help Button

Wearable help alarms

Power plugs
(for kettles and microwaves)

CareBuilder's range of sensors include wearables, E-Health devices and the state-of-the-art falls detection

Smart Watches

E-health devices

Radar Falls Detection

All data is stored in the EEA – using secured and monitored cloud servers.

CareBuilder keeps individuals connected to their professional carers, including the Virtual Care team, their local communities, and their family and friends. This approach provides individuals with more options and control over the care they receive, offering greater peace of mind and enhanced social connectivity.

connecting people to their cherished communities, loved ones and trusted carers

Improved Digital Inclusion:

controlled access to the internet to alleviate boredom and pursuit of personal interests and hobbies

Wellbeing:

supporting physical, mental, and emotional health

24/7 Safeguarding:

enhanced peace of mind, keeping people safe in their homes for longer

Flexibility:

a dynamically adaptable care system addressing changing needs

“ My sister's newfound independence is remarkable, showing how amazing things can happen when you have the right tools and support”

- **MF Edinburgh**

Impact of the CareBuilder System

At the heart of the hybrid care model. The easy to use CareBuilder Technology Enabled Care system is “built” and personalised to the individual, ensuring the outcomes are person centred and delivered in ways that work for them.

Increased Independence:

- Daily Living Reminders and Prompts
- Personalised Prompts (written and verbal)
- Medication management
- AI Verification by unobtrusive Sensors
- Virtual Care Calls (scheduled and adhoc)
- “How To” Video Support Video calling
- Calendar
- Portable Touchscreen Tablet

Reduced Social Isolation:

- Easy Video Calling
- Connecting to Family, Friends & Communities
- Safe & Secure
- Multi Person Video Calls
- WiFi Enabled*

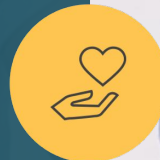

Improved Digital Inclusion:

- Secure Internet Access
- Entertainment Apps.
- Online Shopping.
- Medication Ordering
- Community Links (eg Taxis, gardeners)

Wellbeing:

- How To Videos to Support Physical Activity
- Access to websites supporting mental health.
- Access to games to keep the mind active
- E- Health Monitoring (e.g. BP monitoring)
- System AI Recognises Changing Patterns
- Personalised Content (eg Family Photos)

24/7 Safeguarding:

- 24/7 Discrete Monitoring
- Alerts escalated to the right support at the right time.
- Automatic “push” video capability

Flexibility:

- Add or enhance ADL prompts and reminders.
- Amend level of virtual care calls based on current need
- Mobile Monitoring and Alerts
- Video calling from a mobile phone.
- Easy to react if a person needs to “shield”.
- TEC system is easily installed, removed and redeployed.

CareBuilder Benefits the entire Care Circle

Care Providers & Carers

- ✓ Improved care outcomes
- ✓ Increased visibility and accuracy of care packages
- ✓ Expanded and more flexible care capacity
- ✓ Time and cost reductions
- ✓ Create new opportunities and revenue streams
- ✓ Easy to use app. and dashboards
- ✓ Hassle free install and set up

CareBuilder User

- ✓ Maintain independence at home for longer.
